## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claim 6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 6 is rejected under 35 U.S.C. 102(e) as being anticipated by Reed et al (US 6,115,198).

Regarding claim 6, Reed et al disclose apparatus for word synchronization with large coding distance and fault tolerance for a partial-response maximum-likelihood (PRML) data channel in a direct access storage device (DASD) comprising:

a Viterbi detector (34 in Fig. 2) for receiving equalized PR4 samples including a predefined word synchronization pattern; said predefined word synchronization pattern includes only one or more sequential pairs of zeros and one or more sequential pairs of ones (as shown in Fig. 6A and 6B); said Viterbi detector being optimized for said

Art Unit: 2634

predefined word said predefined word synchronization pattern includes synchronization pattern; said Viterbi detector including

a two-state Viterbi trellis (Fig. 9C); and

a word-synchronization detector (66 in Fig. 2) for said two-state Viterbi trellis.

***Allowable Subject Matter***

4. Claims 3-5, 8-16 and 18-20 are allowed.

5. The following is an examiner's statement of reasons for allowance:

None of the prior art teaches or suggest apparatus for word synchronization with large coding distance and fault tolerance for a partial-response maximum-likelihood (PRML) data channel in a direct access storage device (DASD) comprising: a Viterbi detector for receiving equalized PR4 samples including a predefined word synchronization pattern; the Viterbi detector including a two-state Viterbi trellis; a word synchronization detector for the two-state Viterbi trellis; the word synchronization detector implements a difference metric for the two-state Viterbi trellis and includes a three-way multiplexer; the three-way multiplexer includes an input of added incoming samples, the added incoming samples represented by  $(YK-2 + YK-3)$  two-state Viterbi trellis and the word synchronization detector are operated on a 2T basis, where  $1/T$  is the sample rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
